

Amendments to the Claims

1-11. (Cancelled)

12. (Currently amended) A quickly disintegrating solid preparation comprising a) an active ingredient, b) a saccharide or sugar alcohol with a mean particle diameter of 30 μm to 300 μm , c) a disintegrating agent, and d) a cellulose compound, wherein the saccharide or sugar alcohol is ~~one or more saccharides and sugar alcohols selected from the group consisting of lactose, D-mannitol, trehalose, erythritol, xylitol, maltitol, and sorbitol~~, the disintegrating agent is one or more disintegrating agents selected from the group consisting of carmellose calcium, carboxymethylstarch sodium, croscarmellose sodium, and crospovidone, and the active ingredient is ~~selected from the group consisting of voglibose, candesartan cilexetil and pioglitazone hydrochloride~~.

13. (Currently amended) A quickly disintegrating solid preparation comprising a) an active ingredient, b) a saccharide or sugar alcohol with a mean particle diameter of 30 μm to 300 μm , c) a disintegrating agent, and d) a cellulose compound, wherein the saccharide or sugar alcohol is ~~one or more saccharides and sugar alcohols selected from the group consisting of lactose, D-mannitol, trehalose, erythritol, xylitol, maltitol, and sorbitol~~, the cellulose compound is one or more cellulose compounds selected from the group consisting of crystalline cellulose, powder cellulose, low substituted hydroxypropylcellulose, and carmellose, and the active ingredient is ~~selected from the group consisting of voglibose, candesartan cilexetil and pioglitazone hydrochloride~~.

14-32. (Cancelled)

33. (Currently amended) A quickly disintegrating solid preparation comprising a) an active ingredient, b) a saccharide or sugar alcohol with a mean particle diameter of 30 µm to 300 µm, c) a disintegrating agent, and d) a cellulose compound, wherein the saccharide or sugar alcohol is ~~one or more saccharides and sugar alcohols selected from the group consisting of lactose, D-mannitol, trehalose, erythritol, xylitol, maltitol, and sorbitol,~~ and the active ingredient is ~~selected from the group consisting of voglibose, candesartan cilexetil and pioglitazone~~ hydrochloride.

34. (Currently amended) A quickly disintegrating solid preparation according to claim 12, wherein the mean particle diameter of the D-mannitol ~~saccharide or sugar alcohol~~ is between 35 to 200 µm.

35. (Currently amended) A quickly disintegrating solid preparation according to claim 13, wherein the mean particle diameter of the D-mannitol ~~saccharide or sugar alcohol~~ is between 35 to 200 µm.

36. (Currently amended) A quickly disintegrating solid preparation according to claim 33, wherein the mean particle diameter of the D-mannitol ~~saccharide or sugar alcohol~~ is between 35 to 200 µm.

37. (Currently amended) The quickly disintegrating solid preparation according to claim 12, wherein the D-mannitol ~~sugar alcohol~~ is pulverized.

38. (Currently amended) The quickly disintegrating solid preparation according to claim 13, wherein the D-mannitol ~~sugar alcohol~~ is pulverized.

39. (Currently amended) The quickly disintegrating solid preparation according to claim 33, wherein the D-mannitol ~~sugar alcohol~~ is pulverized.

40. (Currently amended) A quickly disintegrating solid preparation according to claim 12, wherein the preparation contains two different particle sizes of D-mannitol, wherein the mean particle diameter of the first particle of D-mannitol ~~saccharide or sugar alcohol~~ is between 30 to below 90 μm , and the mean particle diameter of the second particle of D-mannitol is between 43 90 to 300 μm .

41. (Currently amended) A quickly disintegrating solid preparation according to claim 13, wherein the preparation contains two different particle sizes of D-mannitol, wherein the mean particle diameter of the first particle of D-mannitol ~~saccharide or sugar alcohol~~ is between 30 to below 90 μm , and the mean particle diameter of the second particle of D-mannitol is between 43 90 to 300 μm .

42. (Currently amended) A quickly disintegrating solid preparation according to claim 33, wherein the preparation contains two different particle sizes of D-mannitol, wherein the mean particle diameter of the first particle of D-mannitol ~~saccharide or sugar alcohol~~ is between 30 to below 90 μm , and the mean particle diameter of the second particle of D-mannitol is between 43 90 to 300 μm .

43-45. (Canceled)
